

PROJECT OVERVIEW

UNIVERSITY OF ARKANSAS BOOKSTORE & PARKING GARAGE

ELEVATION: UNIVERSITY OF ARKANSAS BOOKSTORE & PARKING GARAGE - FAYETTEVILLE, AR

An award winning modern design for a University Campus

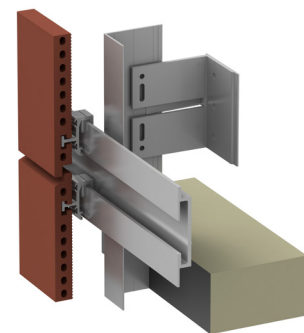

The University of Arkansas Bookstore & Parking Garage is an outstanding award-winning project and has inspired numerous other university-based projects across the country. Designed by Des Moines-based HLKB Architecture, installation incorporated a Terra5 Terracotta Rainscreen, a Fiber Cement Rainscreen, and a unique Terra5 Baguette Sunscreen. Vci.45 and Vci.11 subframing systems formed the basis for all of the rainscreen attachments, including a custom-tailored sunscreen assembly solution, engineered by ECO Cladding.

DETAIL: TERRACOTTA RAINSCREEN PANELS WITH VCI.45 SYSTEM

- **COMPONENT:** ALPHA VCI.45 & VCI.11 SUBFRAMING
- **MATERIAL:** TERRACOTTA & FIBER CEMENT
