

PROJECT OVERVIEW

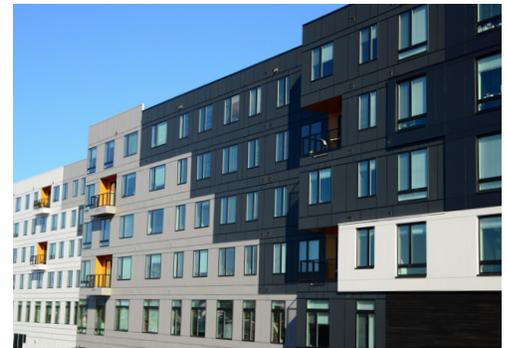

WATERFRONT SQUARE

ELEVATION: WATERFRONT SQUARE - REVERE, MA / ARROWSTREET

A revitalized design for a historic waterfront community

Arrowstreet designed a 230-unit, 220,000-square-foot residential building as a part of the revitalization of Revere's Waterfront Square. The project includes a community/coworking space, courtyard, pool, and a 315-space parking garage. Swisspearl Largo fiber cement rainscreens work in tandem with HPL wood grain panels. The main colors used in the bold façade are Platinum 9020, REFLEX Dark Silver 9221 & Satin White 9291. A VZ.10 and Vci.40 subframing system was utilized. Located across from Revere Beach, the design creates an upscale residential feel in both amenity spaces and the units.
