

PROJECT OVERVIEW

GROVE XXIII CLUBHOUSE

ELEVATION: GROVE XXIII CLUBHOUSE - HOBE SOUND, FL / NICHOLS ARCHITECTS

Michael Jordan's Grove XXIII Clubhouse

Designed by Nichols Architects, Grove XXIII is a private golf course located in Hobe Sound, FL. The Clubhouse is located at the center of a private golf club – specifically designed for the owner's style and speed of play. The design concept for the Clubhouse was born from movement: the swing of a golf club. Carbon fiber panels, local stone cladding, glass frit patterns, and metal detailing are all part of the building's contemporary design. ECO Cladding provided a Vci.40 subframing system for installation.

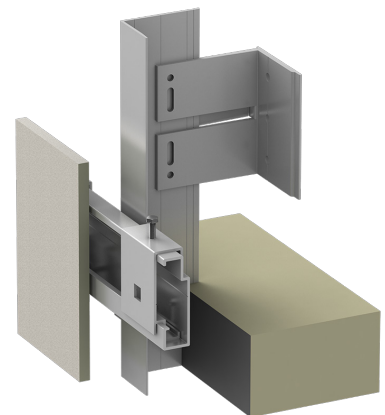

DETAIL: STONE, CARBON FIBER, GLASS, METAL

- **SYSTEM:** ALPHA VCI.40 - Subframing System
- **MATERIAL:** STONE CLADDING, CARBON FIBER, GLASS, METAL
- **ARCHITECT:** Nichols Architects
