

PROJECT OVERVIEW

# SUNY THEATER & ART CENTER

ELEVATION: SUNY PURCHASE CENTER FOR INTEGRATED TECHNOLOGY & LEARNING / FXFOWLE ARCHITECTS

## A Modern Greyscale Accent Façade for SUNY's Theater and Arts Center

FXFOWLE Architects designed SUNY Purchase's new 75,000 SF Center for Integrated Technology & Learning as a combined center for the School of Theater Arts, the School of Film & Media Studies, and other related arts programs. The new facility will add an entry pavilion and gathering space for students.

The screen wall design feature incorporated two layers for walls, using Swisspearl fiber cement panels as accent panels in greyscale. The exterior layer has a perforated metal screen. The fiber cement panels were fastened using our Hci.11 Visible Rivet System.

- **SYSTEM:** Hci.11 Visible Rivet Subframing System
- **MATERIAL:** Swisspearl Fiber Cement
- **ARCHITECT:** FXFOWLE Architects
