

PROJECT OVERVIEW

VECTRA BANK CORPORATE CENTER

ELEVATION: VECTRA BANK CORPORATE CENTER - DENVER, CO / OPEN STUDIO ARCHITECTURE

A Corporate Center Designed for Collaboration, Community & Commitment

Designed by Open Studio Architecture, the New Vectra Bank Corporate Center in Denver, Colorado is celebrating a significant milestone as they begin moving into the bank's new corporate center. Recently completed, the flagship office building was designed for collaboration, community, and commitment.

ECO Cladding's ECI slab-to-slab subframing solution was selected to support the exterior ACM facade on this project. Our Alpha E "edge-to-edge" bracket is specifically designed to be fixed to concrete floor slabs. This unique, engineered, non-combustible subframing approach is capable of spanning story heights without the need for intermediate attachment points which dramatically reduces fastener penetration into the weather barrier. The system is individually

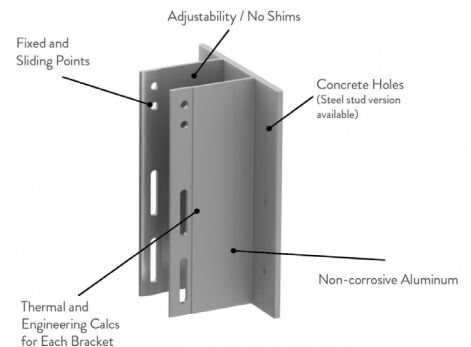

- **SYSTEM:** ALPHA ECI SLAB-TO-SLAB - Subframing
- **MATERIAL:** ACM CLADDING
- **ARCHITECT:** Open Studio
